Finial color will default to frame finish selection

BF CLASSIC BALL
default style

VF VERTEX

Umbrella clearance dimensions are measured while not mounted in a base. Depending on the selected base, these clearance measurements will change. All dimensions and weights have a +/-5" tolerance based on multiple variables; pin placement height, crank tautness and fabric weight.

Please see our "Umbrella Base Guide by Application" on page 42 for recommended base options, based on the umbrella size and desired application (table use or free-standing).
